1 [Storage reorganization techniques for matrix computation in a paging environment](#)

Patrick C. Fischer, Robert L. Probert

July 1979 **Communications of the ACM**, Volume 22 Issue 7**Publisher:** ACM PressFull text available: [pdf\(900.05 KB\)](#) Additional Information: [full citation](#), [references](#), [citations](#)

Keywords: data reorganization, matrix multiplication, pagination, paging, transpose, virtual memory

2 [The “Virtual University”: toward an Internet paradigm?](#)

Linda Carswell

August 1998 **ACM SIGCSE Bulletin , Proceedings of the 6th annual conference on the teaching of computing and the 3rd annual conference on Integrating technology into computer science education: Changing the delivery of computer science education ITiCSE '98**, Volume 30 Issue 3**Publisher:** ACM PressFull text available: [pdf\(665.20 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Universities make the assumption that providing distance education is a simple process of translating from one medium to the next: the current popular medium being the Internet. However, the danger in this approach is two fold. First, if the components of distance education are ill understood then an inappropriate pedagogy and strategy may result. Second, a lack of understanding of the properties of the Internet as a medium may cause unrealistic and unrealisable expectations. Thus the inappropri ...

Keywords: Virtual University, distance education, synchronous and asynchronous teaching, teaching via the Internet

7 DOTSYS III: a portable Braille translator Joseph E. SullivanMarch 1975 **ACM SIGCAPH Computers and the Physically Handicapped**, Issue 15**Publisher:** ACM PressFull text available:  pdf(524.02 KB)Additional Information: [full citation](#), [references](#)**8 Paging as a "language processing" task** Michael W. CondryJanuary 1981 **Proceedings of the 8th ACM SIGPLAN-SIGACT symposium on Principles of programming languages****Publisher:** ACM PressFull text available:  pdf(1.19 MB)Additional Information: [full citation](#), [abstract](#), [references](#)

This paper examines "language processing" approach to paging where the of the programming language compiler or interpreter is responsible for generating the necessary control code for the page management of a program. We explore this idea for *APL* and describe an approach to incorporating in a program the necessary paging functions. The semantics of *APL* computation are examined to observe how paging operations can be incorporated into the computation. We discuss a model of data acce ...

9 Hints for computer system design

Butler W. Lampson

 October 1983 **ACM SIGOPS Operating Systems Review , Proceedings of the ninth ACM symposium on Operating systems principles SOSP '83**, Volume 17 Issue 5

Publisher: ACM Press

Full text available:  [pdf\(1.73 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Experience with the design and implementation of a number of computer systems, and study of many other systems, has led to some general hints for system design which are described here. They are illustrated by a number of examples, ranging from hardware such as the Alto and the Dorado to applications programs such as Bravo and Star.

10 Markup systems and the future of scholarly text processing 

 James H. Coombs, Allen H. Renear, Steven J. DeRose

November 1987 **Communications of the ACM**, Volume 30 Issue 11

Publisher: ACM Press

Full text available:  [pdf\(1.91 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Markup practices can affect the move toward systems that support scholars in the process of thinking and writing. Whereas procedural and presentational markup systems retard that movement, descriptive markup systems accelerate the pace by simplifying mechanical tasks and allowing the authors to focus their attention on the content.

11 MCTS customer task environment 

 R. R. Brown

October 1975 **ACM SIGOPS Operating Systems Review**, Volume 9 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(2.04 MB\)](#)

Additional Information: [full citation](#), [references](#)

12 DOTSYS III: A portable braille translator 

 J. E. Sullivan

August 1973 **Proceedings of the annual conference**

Publisher: ACM Press

Full text available:  [pdf\(573.60 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The subject of braille translation is not a widely familiar one, so that a brief introduction to that topic would seem to be in order before taking up DOTSYS III. Most people know what braille is in general—a coding system employing raised dots so that the sense of touch alone suffices to read. However, contrary to the impression one gets from those little cards, the most widely used codes are not “substitution ciphers”—that is, the braille equivalent of a given &ldq ...

13 Cliché-based program editors 

 Richard C. Waters

January 1994 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 16 Issue 1

Publisher: ACM Press

Full text available:  [pdf\(3.22 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#), [review](#)

Keywords: abstract syntax tree schemas, computer-aided software engineering (CASE), plan diagrams, reuse

14 Document presentation: Support for arbitrary regions in XSL-FO

 Ana Cristina B. da Silva, Joao B. S. de Oliveira, Fernando T. M. Mano, Thiago B. Silva, Leonardo L. Meirelles, Felipe R. Meneguzzi, Fabio Giannetti

November 2005 **Proceedings of the 2005 ACM symposium on Document engineering DocEng '05**

Publisher: ACM Press

Full text available:  [pdf\(520.86 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper proposes an extension of the XSL-FO standard which allows the specification of an unlimited number of arbitrarily shaped page regions. These extensions are built on top of XSL-FO 1.1 to enable flow content to be laid out into arbitrary shapes and allowing for page layouts currently available only to desktop publishing software. Such a proposal is expected to leverage XSL-FO towards usage as an enabling technology in the generation of content intended for personalized printing.

Keywords: LaTeX, SVG, XML, XSL-FO, arbitrary shapes, digital publishing, typesetting

15 The UNIX time-sharing system

 Dennis M. Ritchie, Ken Thompson

January 1983 **Communications of the ACM**, Volume 26 Issue 1

Publisher: ACM Press

Full text available:  [pdf\(740.92 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

UNIX is a general-purpose, multi-user, interactive operating system for the Digital Equipment Corporation PDP-11/40 and 11/45 computers. It offers a number of features seldom found even in larger operating systems, including: (1) a hierarchical file system incorporating demountable volumes; (2) compatible file, device, and inter-process I/O; (3) the ability to initiate asynchronous processes; (4) system command language selectable on a per-user basis; and (5) over 100 subsystems including ...

Keywords: PDP-11, command language, file system, operating system, time-sharing

16 The UNIX time-sharing system

 Dennis M. Ritchie, Ken Thompson

July 1974 **Communications of the ACM**, Volume 17 Issue 7

Publisher: ACM Press

Full text available:  [pdf\(1.15 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

18 Interactive immersion in 3D graphics: Introduction

 Andrew Rosenbloom
August 2004 **Communications of the ACM**, Volume 47 Issue 8

Publisher: ACM Press

Full text available:  [pdf\(278.70 KB\)](#)  [html\(11.69 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Complex 3D worlds built from scientific data or transformed into multiplayer games can be experienced naturally, not just viewed through flat 2D windows.

19 Process migration

 September 2000 **ACM Computing Surveys (CSUR)**, Volume 32 Issue 3

Publisher: ACM Press

Full text available:  [pdf\(1.24 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Process migration is the act of transferring a process between two machines. It enables dynamic load distribution, fault resilience, eased system administration, and data access locality. Despite these goals and ongoing research efforts, migration has not achieved widespread use. With the increasing deployment of distributed systems in general, and distributed operating systems in particular, process migration is again receiving more attention in both research and product development. As hi ...
